Attachment "A"

Proposal for Modification of Advanced  
Operations Seminar as presented in January 1965

1. Attached hereto is the schedule for the first running of the Advanced Operations Seminar. It will be noted that this course relied very heavily on lectures and discussion.
2. In order to provide time for practical work, the lecture portion of the course could be reduced by eliminating the classes followed by a check mark. The course length would then be approximately  $2\frac{1}{2}$  weeks.
3. At the conclusion of the first week, students would be assigned the task of returning to their desks and preparing a project around an assigned type of operation, [REDACTED]  
[REDACTED] The student should begin with a target analysis based on thorough research and end hopefully with a workable plan for implementing an actual worthwhile project. Two days would then be spent in joint examination of the students research by the student, the Chief Instructor, and a DDP member who is a recognized authority in the type of operation being considered.
